

Basic Strategy

Strategy depends on whether you are playing a real money bet or a free bet. There is a difference because a push is just as bad as a loss on a Free Bet, thus causing a more aggressive strategy. The following three tables show the strategy for a real money hand, free bet hand, and pairs respectively.

Free Bet Blackjack: Real Money Hand

House Edge

The player can lower the house edge on the Pot of Gold by splitting fives instead of doubling, at the detriment of the primary wager. If the player splits fives the house edge on the Pot of Gold will be 2.75% under Pay Table 1 and 1.48% under Pay Table 2. Splitting fives, instead of doubling, will increase the house edge on the base wager by 0.15%.
